IN THEIR OWN WORDS

What people said afterwards

We came in with no expectations. I really didn't think the puzzles would be like that, or that there would be all these things hidden in the boxes. It needed all of us, and somehow I found myself leading, but also needing help from the others.

Eyal COGNIZANT

I'll be honest, I came because I wanted pizza. But pretty quickly I saw there was much more to it. I found out new things about people I see every day in the office. And when it was over, we just kept talking.

Dan GEMINI

I thought it was going to be another trivia thing with questions about geography and history, so I planned to sit on the side with a friend. But when it started, we understood it was something different. Even when we didn't know the answers, we really wanted to know them.

Kasia MAJOREL

Usually only half the people really join in. This time, almost all of us were part of it.

Rita YOUTUBE

I've done a lot of team activities before. This one actually felt different.

Marius TELEPERFORMANCE

I liked that people kept talking about the activity even during lunch.
